

BORDER SUMMIT 2020

[Global Challenges, Local Responses]

APRIL 1 & 2, 2020

The U.S.-Mexico border has attracted unprecedented international media coverage in recent years. From the wall and tariffs to family separation and migrant caravans, the border has become the focal point of polarizing discussions and significant challenges. Much of this attention has overshadowed positive examples of local cooperation among leaders in both countries. Border Summit 2020 aims to illustrate how the border serves as a place for dialogue and innovation focused on solving increasingly complex global problems and contributing to a more vibrant North America.
